

Redesign the Misleading Colored Chart

R.No: 4 Reg. No: 192424243 Name: B PALLAVI

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

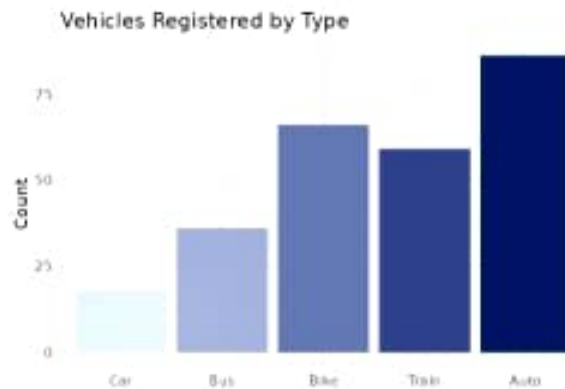

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

3/10/2026

Activity

Redesign the Misleading Colored chart

Chart-1

- (1) The chart is trying to show the Air Quality Index of every month and also it shows how the Air Quality Index changes throughout the year.
- (2) The given colors are very bright and it uses the rainbow colors which was difficult to compare months and do not show the correct values of it.
- (3) Use a single sequential color scheme, such as, light green for low AQI, yellow for Moderate AQI, orange for high AQI, and red for very high AQI.

Chart-2

- (1) The chart is trying to show the number of vehicles registered by type such as cars, Bus, Bike, Train and Auto.
- (2) The color chosen was the shades of color blue. so the categories may not be distinguished clearly.

(3) A better color scheme would use different colors for each vehicle type. The colors should be distinct enough to easily identify each category.
