Decode the chart

(1) Regional Comparison

The chart 1 is trying to tell that Kochi and Ahmedabad has the highest revenue. and the Kanpur has the lowest revenue. The chart shows the values clearly but the vertical axis have plotted from nearly 390 cr.

(2) Market share by product

The Chart 2 is about a pi-chart. It shows how the share market is divided among 10 different products. some products have the higher shares than others. The pi-chart is useful to show the market share percentage clearly. But here the product names and percentage is missing which is difficult to analyze.

(3) chocolate consumption vs. Nobel prizes

The chart-3 shows about the chocolate consumption vs Nobel prizes won time periods. through a line graph. It shows the increase rate of both during the same time periods.

The chart not completely shows the relationship. But it shows that eating more chocolates causes more Nobel prizes.

11) coffee cups/day vs. Typing speed (WPM)

The chart-4 shows that the usage of coffee cups per day consumed and the Typing speed. The points are widely scattered. Here it shows a visual representation but not clearly. More information about the data would be needed for clear explanation.
